

# DNA Ancestry

Discover the journey of your ancestors with a "Deep Ancestry" DNA test. Your comprehensive DNA report will answer key questions about your family's maternal and/or paternal ethnic origins, and provide insight into both your ancient ancestry (50,000 - 100,000 years ago), and your recent ancestry (100 - 1,000 years ago) using the latest in Sanger Sequencing and Fragment Analysis.

## Explore the features included with your DNA Ancestry Report

SecuriGene Labs is proudly the industry's first and only accredited facility to offer post-mortem DNA Ancestry Testing.

Most standard ancestry tests on the market use DNA chips to detect only one type of marker, the SNP marker.

Our laboratory uses Sanger Sequencing technology to decode your entire Mitochondrial DNA sequence, and Fragment Analysis to detect Y-DNA and Autosomal STR markers, resulting in a more precise picture of your family's ancestral origins.

This technology enables you to clearly differentiate between your maternal lineage and your paternal lineage.

### Privacy Protection Guarantee

Your data will not be shared without your express consent, nor used or sold for any unauthorized testing or research.

To proceed with this option, simply notify your funeral director, and indicate your selection on the DNA Banking & Testing Consent Form.

HAPLOGROUP DETERMINATION

### Ancient DNA Ancestry

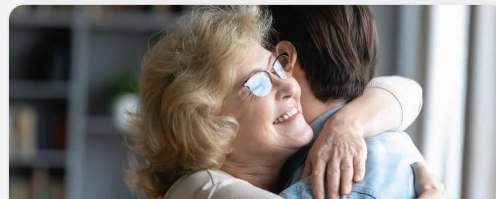

Trace the migration pattern of your ancient ancestors 100,000 years ago as they migrated out of Africa and settled around the World.

mtDNA & AUTOSOMAL STR ANALYSIS

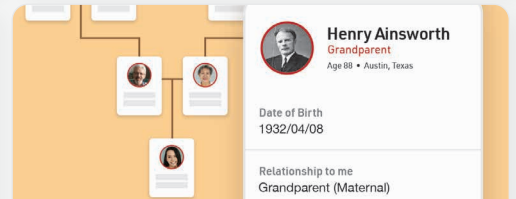

### Recent DNA Ancestry

Trace your "recent" lineage back 100 to 1,000 years ago to see which ethnic groups you originated from on your maternal and/or paternal side of the family.

### DNA Reunion

Search our database of over 2.5 million members to potentially find and connect with long lost relatives. (Complete Ancestry test recommended)

### Family Tree Builder

Invite family members to share stories, upload photos, and document important milestones to give younger generations a chance to learn more about their family.

### Famous DNA

Discover if you are linked to famous historical figures by comparing your Y-DNA or mtDNA with a global database of published forensic archaeological studies.

### Latest DNA Discoveries

Stay up to date with the latest research & discoveries. Participate any time by comparing the data from your DNA report to new studies from around the world.

## BASIC ANCESTRY

Our most popular ancestry option. Your Basic Ancestry report provides an in-depth look at your family's ancient and recent ancestral origins. Includes free lifetime access to our online ancestry database.

## COMPLETE ANCESTRY

Complete Ancestry provides you with a high resolution report into your family's lineage. Recommended for families looking to make full use of our online DNA Reunion database to find long lost relatives.

**!** If you are interested in preserving DNA, but need more time to decide on additional testing, please request a callback in the "Special Requests" section of the Consent Form. A SecuriGene specialist will contact you as soon as the sample arrives at our laboratory.
